**BELUGA**

Whale of the family Monodonta that lives in cold seas. Length: 4-5.5m

Optics and water aren't different in terms of biological classification. A creature less than ten long is called a whale and one of superior length is a whale.

IT'S A BELUGA.

WHAT'S THAT BEAST?

EH, A SHOW !?

Nice

I'M SHIRALUMI KANA AND I WILL EXHIBIT THE WELCOMING SHOW.

A beluga is also called a white whale, and Shiralumi literally means white sea.

FOR THAT PURPOSE, I'VE EXAMINED OVER 120 ROMANTIC EIGHTSEENING SPOTS !!

THEN I'LL JUST NEED TO TAKE THE CHANCE TO BE ALONE WITH HER !!

EVERY-ONE FROM THE SETON ACADEMY !!

WELL, I THINK WE JUST WATCH THEM.

SOUNDS FUN! I WANT TO DO IT TOO !!

THINGS LIKE SEA SWIMMING OR EXPERIENCING FISHING, AND THE STUDENTS FROM THE BRANCH ALSO DO SHOWS.

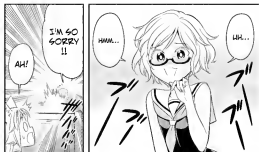

BY THE WAY, WHAT ARE THEY DOING IN THE SEASIDE SCHOOL?

THIS WAY !!
